# MATERIAL, POWER, & LIGHTING OPTIONS

Symmetric beam with clear diffused lens

Symmetric beam with white diffused lens

Asymmetric beam with 1/2 clear and 1/2 non-translucent white lens

## LENS OPTIONS:

- Clear w/ Prismatic Diffusers
- Opal w/ White Diffusers
- Clear w/ No Diffusion (*Asymmetric*)
- Clear (*Dot System*)

## LIGHTING DISTRIBUTION:

- Symmetric or Asymmetric

## LIGHTING LEVELS:

### LINEAR

- High Output  
3.87W / 443lm per ft.
- Medium Output  
2.77W / 334lm per ft.
- Low Output  
1.34W / 173lm per ft.

### DOT SYSTEM

- 120lm each
- 100lm/W

THE PRODUCTS IN THIS CATALOG ARE TESTED AND HAVE BEEN FOUND TO CONFORM TO THE APPROPRIATE UL STANDARDS FOR SAFETY.

SOLAVANTI LIGHTING & EFFICIENT-TEC INTERNATIONAL UTILIZES THE TESTING AND CERTIFICATION SERVICE OF ETL, A NATIONALLY RECOGNIZED TESTING LABORATORY.

## COLORS:

### LINEAR

- Warm White 2700K CCT
- Warm White 3000K CCT
- Linear White 4000K CCT
- RGBW
- Amber

### DOT SYSTEM

- Warm White 2700K CCT
- Warm White 3000K CCT
- White 4000K CCT

## GENERAL OPTIONS:

- Illuminated LEDRail®
- Non-Illuminated
- Curved
- Spiral

## HANDRAIL OPTIONS:

- 1.67" O.D. Stainless Steel (1-1/4" Pipe)
- 1.90" O.D. Stainless Steel (1-1/2" Pipe)
- 1.50" Square Stainless Steel
- 1.66" O.D. Aluminum (1-1/4" Pipe)
- 1.90" O.D. Aluminum (1-1/2" Pipe)

## FINISH OPTIONS:

### 316 STAINLESS STEEL

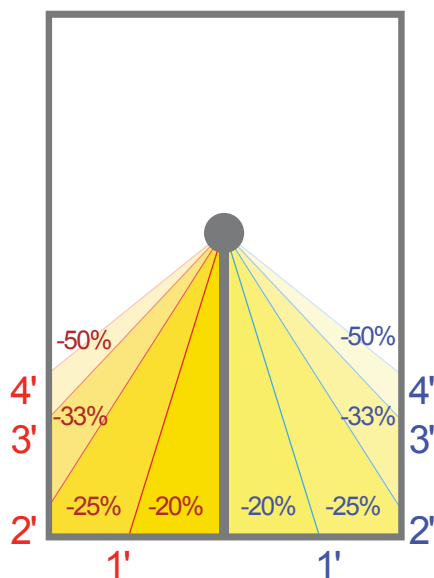

- w/ #6 (320 grit) Satin Finish
- w/ #8 High Polish Finish

### ALUMINUM W/ POWDER COAT

- RAL Color
- Custom Colors
- Anodized Effects
- Simulated Wood Grain

MODEL NAME:  
**MARIDA**

## APPLICATION:

### **FREE-STANDING**

- Embed Mount
- Flange Mount
- Fascia Mount
- Base Plate

## IP RATING:

**IP67**

## MATERIALS:

### POSTS:

- 316 Stainless Steel
- 6061 Aluminum

### HANDRAIL:

- 316 Stainless Steel
- 6061 Aluminum (*non-illuminated*)
- 6063 Aluminum (*illuminated*)

### CAP RAIL:

- 316 Stainless Steel
- 6061 Aluminum (*non-illuminated*)
- 6063 Aluminum (*illuminated*)

### ALANE HORIZONTAL RODS:

- 12mm or 14mm Horizontal  
316 Stainless Steel

### MARIDA VERTICAL RODS:

- 12mm or 14mm Vertical  
6061 Aluminum or 316  
Stainless Steel Rods

## ALANE

This horizontal rail application is accented by multiple 3/8" to 9/16" thickness horizontal solid rods as the infill between posts.

It is available for illuminated and non-illuminated applications. A variety of mounting options can be used including embed, fascia, and base plates.

This design comes in stainless steel alloy 316 standard, as well as aluminum.

A number of finishes can be accommodated to fit the style of your needs.

## MARIDA

This design incorporates multiple vertical rods as the infill between posts, creating the classic picket appearance. Infill is available in 3/8" to 9/16" thickness, and in solid or hollow material.

It is available for illuminated and non-illuminated applications. A variety of mounting options can be used including embed, fascia, and base plates.

This design comes in stainless steel alloy 316 standard, as well as aluminum.

A number of finishes can be accommodated to fit the style of your needs.

### **HANDRAIL:**

- 316 Stainless Steel
- 6061 Aluminum (*non-illuminated*)
- 6063 Aluminum (*illuminated*)

### **CAP RAIL:**

- 316 Stainless Steel
- 6061 Aluminum (*non-illuminated*)
- 6063 Aluminum (*illuminated*)

### **CABLE:**

- 316 Stainless Steel Cable 3/16", 1×19 In-Fill

## HELIA

This is the classic standard of a through-the-post cabling system incorporating a discreetly located cable tensioner inside the end posts.

It is available for illuminated and non-illuminated applications. A variety of mounting options can be used, including embed, fascia, and base plates.

This design comes in stainless steel alloy 316 standard, as well as aluminum.

A number of finishes can be accommodated to fit the style of your needs.

## ENCIA

This popular model puts a twist on the standard cabling system by offsetting the cable to the posts by using individual holders at each post for each cable.

This is a very modern and technical design with surface mounted machined hardware. It is available for illuminated and non-illuminated applications.

A variety of mounting options can be used, including embed, fascia, and base plates.

This design comes in stainless steel alloy 316 standard, as well as aluminum. A number of finishes can be accommodated to fit the style of your needs.

- 6063 Aluminum (*illuminated*)

### **CAP RAIL:**

- 316 Stainless Steel
- 6061 Aluminum (*non-illuminated*)
- 6063 Aluminum (*illuminated*)

## MYRIS

This is the Efficient-Tec torchbearer as our original design. It uses a simple yet elegant look to use in any wall mount handrail application.

Available for illuminated and non-illuminated applications, this design comes in stainless steel alloy 316 standard, as well as aluminum.

A number of finishes can be accommodated to fit the style of your needs.

## ANDA

This popular free-standing, one-line rail design incorporates a sleek and contemporary look with no infill between posts.

It is available for illuminated and non-illuminated applications. A variety of mounting options can be used including embed, fascia, and base plates.

This design comes in stainless steel alloy 316 standard, as well as aluminum.

A number of finishes can be accommodated to fit the style of your needs.

#### GLASS (*Sophelle*):

- Felle Standard 1/2" or 3/8" Tempered Glass

## SOPHELLE

Structural glass is all the rage, and this system is the most unique on the market.

It is available for illuminated and non-illuminated applications. Fascia, surface, and embed are available for mounting options. Optional handrail can be used.

This design comes in stainless steel alloy 316 standard, as well as aluminum.

A number of finishes can be accommodated to fit the style of your needs. Glass can be etched with a company logo as well.

When incorporating etched glass logos and bottom lighting, nothing is as spectacular to the eye as this system.

## BOSS

The most effective way mount structural glass to a stair stringer is the BOSS Rail system.

Mounting buttons come in a variety of sizes for any thickness of glass. Optional glass mount handrail is available for this model.

It is available for illuminated and non-illuminated applications for the optional handrail. This design comes in stainless steel alloy 316 standard, as well as aluminum.

A number of finishes can be accommodated to fit the style of your needs. Glass can be etched with a company logo as well.

## FELLE

This is the classic standard of in line glass clamp design to hold the glass infill panels in .375" or .500" thickness.

It is available for illuminated and non-illuminated applications. A variety of mounting options can be used including embed, fascia, and base plates.

This design comes in stainless steel alloy 316 standard, as well as aluminum.

A number of finishes can be accommodated to fit the style of your needs. Glass can be etched with a company logo as well.

## SANIA

This inline retainer design is used with glass infill panels .375" or .500 thickness. The button mounts are attached to the center of the posts, creating an offset glass infill.

It is available for illuminated and non-illuminated applications. A variety of mounting options can be used including embed, fascia, and base plates.

This design comes in stainless steel alloy 316 standard, as well as aluminum.

A number of finishes can be accommodated to fit the style of your needs.

## STRIA

This dual retainer design is used with in-line glass infill panels .375" or .500 thickness.

The button mounts are attached to the center of the posts and offset, creating a center mounted glass infill. It is available for illuminated, additional edge illumination, and non-illuminated applications.

A variety of mounting options can be used including embed, fascia, and base plates.

This design comes in stainless steel alloy 316 standard, as well as aluminum.

A number of finishes can be accommodated to fit the style of your needs. Glass can be etched with a company logo as well.

- Specified Pattern Mesh Panel

## ZARIA

This design uses metal infill panels between posts. Hundreds of panel designs are available, from perforated metals to metal meshes and weaves.

It is available for illuminated and non-illuminated applications. A variety of mounting options can be used including embed, fascia, and base plates.

This design comes in stainless steel alloy 316 standard, as well as aluminum.

A number of finishes can be accommodated to fit the style of your needs.

**Efficient-Tec International, LLC** offers a complete handrail solution for your code compliant projects.

**ETIs S3** (stainless steel systems) handrail solutions can meet any requirement, either from our standard line of products or with modification from the in house engineering and fabricating staff.

Your solutions are all here whether using our LED illuminated handrail (**LEDRail™**), standard guardrail, stairway handrail or spiral staircase handrail.

The choices for project compliments are expanded with our standard steel rod, cable or glass guardrail infills.

Our product line gives architects, designer and specifiers multiple options in fittings, mountings and decorative elements that will deliver the quality product demanded by ETI clientele.

We look forward to assisting your next handrail solution!

Sincerely,

**Efficient-Tec International, LLC**  
**S3 Handrail Systems**

## Handrail Code Compliance

S3 handrails are always built to **ADA**, IBC and IRC codes but can be specified according to any of the listed building standards.

## Incorporating S3 handrail into your project:

When requesting a quotation or specifying our handrail products, please provide as much information as possible in order to insure a more accurate specification and quotation. Fully dimensioned plan view and elevation view drawings are requested in order to fully understand the scope of the project.

Upon acceptance of the order, we will prepare detailed approval drawings for field verification and acceptance by the customer.

Once the drawings are verified for accuracy and approved with a customer signature, we will begin the manufacturing process.

### Handrails and Guardrails

- **Handrails** provide guidance
- **Guardrails** prevent accidental falls

**Handrails** are located 34" - 38" above stair nosings or ramps.

**Guardrails** are generally required for ramps, stairs, or landings that are elevated more than 30" off the ground. The guardrail heights will vary depending upon local code, but typically are a minimum of 42" in height above the ramp, stair, or landing finished floor surface.
