Capabilities Statement

Efficient-Tec International, LLC, established in May of 2001, manufactures code-compliant complete metal handrail and guardrail systems to meet any requirement, either from our standard line of products or with modification from the full service in-house engineering and fabricating staff. ETI specializes in ornamental metal railing systems in stainless steel, aluminum, bronze and copper, both LED-illuminated and non-illuminated. Our product line gives architects, designers and specifiers multiple options in fittings, mountings and decorative elements to achieve value through exceptional quality in aesthetic design, functionality, and durability.
